rev. 01/04/19

For Research Use Only. Not For Use In Diagnostic Procedures.

Description: This product is a ready-to-use buffer, optimized for the dilution and incubation of both conjugated and unconjugated antibodies in flow cytometry assays (F). The buffer is formulated with 1X phosphate-buffered saline (PBS) compatible for use with live or fixed cells, and contains bovine serum albumin (BSA) to prevent antibody aggregation. Cell Signaling Technology recommends using this buffer according to our protocols for flow cytometry-approved antibodies to ensure accurate and reproducible results.

Storage: This product contains 0.05% sodium azide as a preservative and is stable for 12 months when stored at 4°C.

Directions For Use: Dilute antibodies according to product-specific recommendation.

For product-specific protocols and a complete listing of recommended companion products please see the product web page at www.cellsignal.com.
