Nuclear Receptor

Type I Steroid Receptors (Homodimers)

- Ligand
- HSP90
- Homodimerization

Type Ila Non-steroid Receptors (RXR Heterodimers)

- Ligand
- HSP90
- HRE
- TATA
- Transcriptional Activation
- Transcriptional Repression

Type IIB Orphan Receptors (Monomers and Homodimers)

- HRE
- TATA
- Transcriptional Activation
- Constitutive Transcriptional Repression

Pathway Diagram Key

- Acetylase
- Apoptosis/Adapthy Regulator
- Cell Cycle Regulator
- Deacetylase or Cytokine-related Protein
- Growth Factor/Cytokine/Development Protein
- GTPase/GAP/GEF
- Metabolic Enzyme
- Methytransferase or G-protein
- Receptor
- Ubiquitin/Ubiquitin-like or Deubiquitlase
- Transcription Factor or Transcription Factor
- Other
